**Subject:** Electrolux wells

Brian,

Wanted to provide you with an update. The southernmost monitoring well screened from 123-133') produced lots of good water yesterday and we were able to sample it with no problem. The well just south of the tracks (screened 88-98') is not producing much, around 0.04-0.08 gpm. We're doing as best we can to clean it up but at that recharge rate it likely will not give clean water. We're going to surge and pump a few more times and then sample.

Thanks,

Kirk
